Zarkower, A., 97

Acute cigarette smoke exposure causes lung injury in rabbits treated with ibuprofen, 113
Aluminum, sustained efficacy of, to reduce quartz toxicity in the lung, 205
Antibody-forming cell response, pulmonary, in the guinea pig after intratracheal immunization, 193
Antigens, *Escherichia coli* and sheep red blood cell, introduced via the respiratory tract, comparative humoral responses to, 97
Asbestos-induced fibrosis in rats, increase in lung mast cells and autacoid content, 311

Bleomycin-induced lung fibrosis, impairment in coupled beta-adrenergic receptor and adenylate cyclase system during, in hamsters, 401
Bronchalveolar lavage fluid, comparative study of, effect of species, age, and method of lavage, 329

Calcium pyrophosphate, sequential study of pleural peritoneal and blood cells in acute pleurisy induced by, in the rat, 241
Chylomicron metabolism by normal and injured isolated rat lungs, 45
Clara cells, immunohistochemical demonstration of cytochrome P-450 monooxygenase, throughout the tracheobronchial airways of the rabbit, 59
Clara cell specific protein, isolation and amino acid composition of the isotypes from a rat, 299
Cyclooxygenase metabolites contribute to oleic acid-induced lung edema by a pressure effect, 69
Cytochrome P-450 monooxygenase, immunohistochemical demonstration of, in Clara cells throughout the tracheobronchial airways of the rabbit, 59

Developing ferret tracheal epithelium, features of, ultrastructural observations of in vivo and in vitro differentiation of ciliated cells, 223

Inhaled particles, deposition and clearance of, by beagle dogs previously exposed to SO_2, 417

LTB_4 production by rat alveolar macrophages, effects of phagocytosis, receptor binding, and ionophore stimulation, 385
Lymphoid cells, analytical and functional assessment of, within murine lung, 13
Lymphokine-induced phenotypic changes in cells of a type 2 pneumocyte-related strain, characterization of activity in mitogen-stimulated

spleen cell supernatants, 127
Lysosomal enzyme release by rat alveolar macrophages, effects of phagocytosis, receptor binding, and ionophore stimulation, 385

Macrophages:
alveolar, LTB_4 production and lysosomal enzyme release, by rat, effects of phagocytosis, receptor binding, and ionophore stimulation, 385
pulmonary, compartmental origin of, from mechanically disrupted lung tissue, 361
Methylglyoxal bis(guanylhydrazone), pulmonary uptake of, effect of altered inflation on, 1
Mucin, platelet activating factor stimulates secretion of, by explants of rodent airways in organ culture, 25
Mucociliary transport, tracheal, in laboratory mice, evidence for genetic polymorphism, 185

Neutrophil elastase, human, ultrastructural study of the response of hamster bronchial epithelium to, 279

Platelet activating factor stimulates secretion of mucin by explants of rodent airways in organ culture, 25
Polymorphonuclear leukocytes, impaired function of, exuded into bronchoalveolar spaces infected with *Pseudomonas aeruginosa* in steroid-treated rabbits, 141

Somatomedin C/insulin-like growth factor I production by human fetal lung tissue maintained in vitro, 449
^{35}Sulfate label, autoradiographic studies of the distribution of, in ferret trachea, effects of stimulation, 83
Sulfated macromolecular glycoconjugates, dog tracheal epithelial cells in culture synthesize, and release them from the cell surface upon exposure to extracellular proteinases, 157

Type II cells, alveolar, effect of substratum and serum on the lipid synthesis and morphology of, in vitro, 427

Ultrastructure of hamster bronchial epithelium, 253

Vascular reactivity, pulmonary, pregnancy- and gender-related changes in, 343
